

# Consumer Confidence Reports (Water Quality)

The Consumer Confidence Report provides a summary of last year’s water quality and has been prepared to inform the City of Boardman water customers about their drinking water. Included are details about where your water comes from, what it contains, and how it compares to State and Federal drinking water standards.

The City of Boardman Public Works Department vigilantly safeguards its water supplies and provides thorough treatment to ensure that our customers receive high-quality drinking water. We are committed to providing our customers with accurate information about their water.
