

Public Survey for Boardman Interchange Area Management Plan

November 1, 2006

1. What works well today as it relates to traffic access and circulation around the freeway interchange area?
2. Are there any safety or operational issues that you feel need to be addressed through this study?
3. Do you have ideas or specific suggestions about how to address the issues you noted above?
4. How could the city improve the bicycle and pedestrian access and safety around the freeway interchange?
5. Does large truck parking impact traffic access and circulation near the interchange?
6. Do you think traffic access controls (curbs, turn lanes, or medians) help or hurt traffic around the freeway interchange?
7. How should improvements identified through this plan be funded?
8. How can the city provide the best opportunities for public understanding and input on these issues?
